

1. In order to use CorrLinks Video Service, you must meet the following requirements:
 - a. A computer running Microsoft Windows 10 (or newer versions). Windows phones are not supported.
 - b. Your computer must have a webcam, speakers, and microphone; all of which must be fully functional under Windows before trying to install CorrLinks Video Service.
 - c. Wireless earbuds are not compatible with the CorrLinks Video Service.
 - d. You must have administrative rights on the computer you will be using, so that you can install the CorrLinks Video Service software.
 - e. Your computer must have high speed internet service that has the sufficient capacity and quick responsiveness needed to host a video session. The service requires a minimum of 500 kbps download and upload speed, and latency less than 100 ms.
 - f. The network connection has to allow the CorrLinks Video Service to be able to communicate with the secure servers controlling the video session.
2. CorrLinks Video Service is not compatible with Macbooks.
3. You will not be able to join a video session, if your computer does not meet the system requirements.
